

Philosophy

Our Philosophy at Schole International Academy (SIA) is to create and exist in a community dedicated to nurturing courageous, creative and independent learners that embrace life and school with exuberance, whilst striving for excellence in all that we do.

Our Vision

Our vision at SIA is to empower students to acquire, demonstrate, articulate and value knowledge and skills that will support them, as life-long learners in a holistic environment, to participate in and contribute to the global world and practice the core values of the school: respect, tolerance & inclusion, with excellence. We, at Schole, believe in providing our students our students with local and global experiences through International Mindedness as our central belief, towards a peaceful and sustainable future.

Our vision for the school is at the heart of all that we hope to achieve at SIA. As our main purpose is to create lifelong learners, we have defined learning as follows:

“The acquisition, retention and application of knowledge and skills through explanation, experimentation or experience which leads to a transformation of thinking, increased capability and behavioral change in the future.

Our Mission

Our mission statement explains how we intend to go about transforming our vision into reality. It is to enable all learners’ access to learning through the provision of:

- Differentiated, in-depth and cohesive learning programs aligned to your level of achievement
- A concept-driven system
- Highly efficient facilitators focused on improving student outcomes, through their commitment to on-going professional development
- Effective teaching & learning, evidence based practices, coaching and mentoring with collaborative planning strategies
- A quality inclusive learning environment that is responsive to student voice
- Enriching, engaging resources

- Opportunities for community and parents to participate in learning and decision-making partnerships

What is Schole?

Scholé is a Greek word for leisure as well as the root of Latin scola, meaning English school. Hence, it has come to stand for a combined definition of an institution of education that imparts leisure; providing education, relaxation and intellectual stimulation and satisfaction.

Why is Scholé different?

Scholé is different because emphasis is on the child's learning. The students will be provided into a state of critical thinking, analysis and in-depth inquiry. Students will be encouraged to explore and investigate every topic from origin to reason with questions, research, creativity, oral, written and visual language, be it musical, theoretical or pictorial.

Why Scholé?

We offer a dynamic, purpose built campus as per international standards, designed to motivate the student without restrictions and with the notion that anything is possible. Our education system does not allow any member of our community to remain uninvolved and addresses different learning styles for every different kind of learner. The campus is equipped with ramps and easy access for physically challenged individuals.

Our Values

The SIA community expects members to:

- Be honest and act with integrity
- Avoid prejudice by developing views based on reason and understanding
- Be compassionate, empathetic and responsible
- Embrace challenges
- Help each other
- Embrace people of all cultures
- Minimize their harmful impact on the environment

Our community members include students, parents, teachers and all staff at our campus.
